YOUR COMPANY NAME

INDUSTRIAL FASTENERS

Reliable fastening and sealing solutions for industrial, construction and engineering applications.

PRODUCT RANGE

Industrial Fasteners • SDS Screws • Rivets • Silicone Sealants

SAMPLE BROCHURE — Replace the company name, logo, product photos and contact details with your own branding.

Fastening Solutions for Every Application

We offer a broad range of fastening and sealing products for fabrication, automotive, construction, electrical, furniture, HVAC and general engineering requirements. Products can be specified in different materials, finishes, dimensions and pack sizes according to application and customer requirements.

Our Product Range

01 Industrial Fasteners

Fastening components for assembly, maintenance, machinery and manufacturing.

Common options

Hex bolts & nuts, machine screws, washers, threaded rods, anchors, studs and specialty fasteners.
Materials: carbon steel, stainless steel and other grades on request.

02 SDS / Self-Drilling Screws

Screws designed to drill and fasten suitable sheet materials in one operation.

Common options

Hex washer head, pan head, wafer head and other profiles; with or without bonded washers.
Finishes: zinc plated, coated and stainless options.

03 Rivets

Mechanical joining solutions for sheet metal, panels, enclosures and fabrication.

Common options

Blind / pop rivets, open-end, closed-end, large-flange and multi-grip options.
Materials: aluminium, steel and stainless steel.

04 Silicone Sealants

Flexible sealing products for compatible glazing, construction, sanitary and general-purpose applications.

Common options

General-purpose, neutral-cure and sanitary-grade options, subject to availability.
Common cartridge and pack sizes.

Product Details & Applications

Industrial Fasteners

Used in machinery, fabrication, infrastructure, equipment assembly and maintenance. Selection depends on load, environment, base material, thread type and required standard. Metric and inch sizes can be listed in the final catalogue.

SDS / Self-Drilling Screws

Suitable for approved metal-to-metal and metal-to-wood fastening applications. Select the correct drill-point capacity, screw length, head style, coating and washer type for the substrate and installation conditions.

Rivets

Useful where access is available from one side or a permanent mechanical joint is required. Match rivet diameter, grip range, body material and mandrel material to the joint design.

Silicone Sealants

Used for sealing joints and gaps in compatible applications. Confirm substrate compatibility, curing type, movement capability, temperature range and indoor/outdoor suitability from the product technical data sheet.

Industries We Serve

Construction & Infrastructure	Automotive & Transportation
Metal Fabrication & Engineering	Electrical & Electronics
HVAC & Building Services	Furniture & General Manufacturing

Quality, Supply & Customisation

We aim to make product selection and procurement straightforward with clear specifications, consistent supply and responsive support. Product standards, grades, dimensions, coatings, certificates and inspection requirements can be confirmed against the final quotation and purchase order.

Information to Confirm When Ordering

Product type	Fastener / screw / rivet / sealant
Size & dimensions	Diameter, length, thread and head type
Material & grade	As per drawing, standard or application
Finish / coating	Zinc, stainless, coated or other requirement
Quantity & packing	Pieces, boxes, cartons or bulk
Documentation	Test certificate / compliance documents, if required
